

ENHANCED CARE AT HOME

HOW HOME CARE PROVIDERS
CAN EASILY DELIVER DIGITAL HEALTH CHECKS

AN EXTRA LEVEL OF CARE

Home care providers are using Whzan's digital health checks to offer better care for clients, reassurance and comfort to loved ones and strengthen relationships with ICBs.

Whzan is helping partners to tender, win and retain business across home care, extra care, and live-in care, with our simple-to-use digital health system.

Whzan is a digital health company from the Isle of Wight, providing comprehensive remote health and activity monitoring systems for vulnerable people, in the place they call home.

Since 2010, our technology has been supporting carers to raise the quality of their services and feel confident they can contact healthcare professionals with validated information.

The Whzan ecosystem is already commissioned and deployed across the NHS from Cumbria to Cornwall and used in thousands of care settings.

A PORTABLE TELEHEALTH KIT

The Blue Box is an innovative all-in-one vital signs and health monitoring system. The portable, easy-to-clean box contains a set of Bluetooth instruments and a tablet computer pre-loaded with assessments and information.

This enables carers with no formal training to complete a comprehensive digital health check, whilst in the comfort of your client's home.

These assessments help validate concerns by identifying changes in condition and early signs of deterioration, allowing confident escalation when appropriate.

COMMON LANGUAGE

NEWS2 is a standardised health assessment created by the Royal College of Physicians, routinely used within the NHS to monitor illness and signs of changing conditions. With this tool, your carers will be using a common language with NHS clinicians, removing ambiguity and any doubts that your client needs further help.

Using the Whzan tablet computer and supplied instruments, an automated NEWS2 score can be completed in a couple of minutes.

MORE THAN A BOX

All service user data feeds into your secure cloud dashboard for easy case viewing and reporting.

The data can be provided to your clients, their loved ones, and local GPs, containing up-to-date, reassuring information about their health and care, deepening the quality of your services.

WHAT'S IN THE BLUE BOX?

GSM Samsung tablet PC with a wide range of wireless Bluetooth assessment tools including

- Thermometer
- Pulse Oximeter
- Blood Pressure Monitor
- 50+ NHS assessments including NEWS2, soft signs, hypertension, hydration
- Optional scales

NEWS2

(NATIONAL EARLY WARNING SCORE)

NEWS2 was developed to improve detection and response to deterioration in patients and is a key element of patient safety and improving patient outcomes. NEWS2 is a standardised system used across the NHS to monitor illness and signs of deterioration.

The six physiological parameters for a NEWS2 score are:

- | | |
|--|--|
|  Temperature |  Respiratory rate |
|  Blood pressure |  Pulse rate |
|  Blood oxygen |  Consciousness |

NEWS - Adelaide Marmalade

Press on any reading to enter its value manually

Blood pressure 120 / 80	Blood Oxygen 98 % (SpO2)	Pulse 75 BPM	Temperature 37.2 °C
----------------------------	-----------------------------	-----------------	------------------------

Respiration
16 Breaths

Level of Consciousness: **Alert** Confusion Verbal Pain Unresponsive

Is there a specific clinical concern?
☐ Yes ☒ No

Does the patient breathe air or take supplemental oxygen?
☒ Air ☐ Oxygen

NEWS2 Score: 0 Clinical Risk: Low

Submit

"The Whzan Blue Box has contributed towards the high standard of care support provided to service users. The Blue Box is a comprehensive tool that makes service user support accessible for care staff and reduces emergency hospital admissions."
